# Webinar Bridging the Gaps on Climate Change and Principle-based Taxonomy (CCPT) Reporting 16 May 2024 9:00 am - 12:30 pm

### **ABOUT THE PROGRAMME**

The Climate Change and Principle-based Taxonomy (CCPT) issued by Bank Negara Malaysia (BNM) in 2021 is a crucial framework for financial institutions (Fls) to assess and categorise economic activities and facilitate standardised classification and reporting of climate related exposures to support risk assessments, strengthen accountability and market transparency. Since the commencement of submissions to BNM in 2022, Fls are expected to refine CCPT reporting and rectify any CCPT anomalies, which has resulted in inaccurate classification and varying interpretation. A systematic and consistent classification of economic activities would promote channelling of financial flows to activities that support climate change. It is imperative to integrate climate change considerations in operations and strategies given the impact of climate change on an Fl's value, viability and profitability.

This webinar will delve into the complexities of climate change considerations in CCPT reporting and provide participants an overview of climate and sustainability taxonomy trends and developments in Malaysia and regionally. Guiding principles and considerations for an effective CCPT implementation, sectoral assessment as well as incorporating CCPT into an FI's Risk Acceptance Criteria will be examined. The webinar will also assess challenges and scenarios faced by FIs in implementing CCPT as well as real life case studies on CCPT application for investment banking clients.

# **LEARNING OUTCOMES**

- Review trends and developments of sustainability taxonomies regionally and in Malaysia;
- Analyse the considerations in embedding CCPT in business operations;
- Discuss the recommended actions in implementing CCPT within the areas of governance, risk management, products, and capacity building; and
- Analyse case studies of companies implementing principlesbased taxonomy, their challenges and opportunities

### **SPEAKER**

Mr Jimmy Tee
Director, Sustainability and Climate
Change, Assurance - Financial Services
PricewaterhouseCoopers Risk Services
Sdn Bhd

Jimmy is a Director in the Assurance practice in Malaysia with over 10 years experience in the financial services industry.

He is mainly involved in the audit engagements for a number of large local banking groups comprising of commercial, Islamic and investment banks and business advisory engagements such as financial due diligence as well as risk and regulation-related engagements in the financial services industry.

Jimmy has led a gap assessment for climate risk management and readiness assessment based on Task Force on Climate-Related Financial Disclosures (TCFD) recommendations and developed implementation roadmap for a financial institution. In addition, he led a TCFD diagnostic assessment for a large listed banking group in Malaysia and provided enhancement recommendations.

Other projects that he has led includes implementation of an Integrated Governance, Risk and Compliance (GRC) solution for an Asean Stock Exchange comprising more than five (5) use cases cutting across the Risk Management, Compliance and Business Continuity Management practices and a gap assessment on Operational Risk Management function for a local bank in Malaysia, focusing in the areas of Risk and Control Self Assessment (RCSA), Key Risk Indicators and Incident Management and reporting against the requirements of BNM Guidelines on Operational Risk and ORION.
